

LO THANH ANH

Backend Developer

Di An Ward, Ho Chi Minh City • 0358 988 590 • thanhhanh982004@gmail.com

PERSONAL INFORMATION

Date of Birth: 09/08/2004

Address: Di An Ward, Ho Chi Minh City

Phone: 0358 988 590

Email: thanhhanh982004@gmail.com

OBJECTIVE

Backend Developer with a strong foundation in Java Spring Boot and NestJS, experienced in building RESTful APIs, designing system architecture, and managing databases (MySQL, PostgreSQL, MongoDB). Skilled in implementing authentication (JWT), authorization (RBAC), and optimizing system performance.

My goal: To apply backend development knowledge in a real environment, enhance technical skills, and gain practical experience in building real-world projects.

EDUCATION

Posts and Telecommunications Institute of Technology (PTIT)

Ho Chi Minh City

Major: Software Engineer

2022 – 2027

Final-year Information Technology student

GPA (most recent semester): 3.03 / 4.0

English Certificate: TOEIC 590

SKILLS

Programming Languages: Java, JavaScript, TypeScript

Frameworks: Spring Boot, NestJS

Databases: MySQL, PostgreSQL, MongoDB

Security: JWT Authentication, Role-Based Access Control (RBAC)

Other Tools: GitHub, Docker, Swagger/OpenAPI, Multer

PERSONAL PROJECTS

Job Recruitment Java

Spring Boot 4, Spring Security, Spring Data JPA, MySQL

GitHub: <https://github.com/ThanhAnh2004/Job-Recruitment-Java.git>

- Built a RESTful backend API for a job recruitment platform using Spring Boot 4, Spring Security, Spring Data JPA, and MySQL.
- Managed users, roles, and endpoint-level permissions; handled companies, job postings, and candidate resumes.
- Implemented JWT-based authentication with access token and refresh token support; handled login and registration flows.
- Enabled resume file upload/download and automated job recommendation emails based on subscriber skills.
- Delivered full API documentation via Swagger/OpenAPI.

LaptopShop Ecommerce

Spring Boot MVC, Spring Data JPA, Spring Security, MySQL

GitHub: <https://github.com/ThanhAnh2004/LaptopShop.git>

- Developed a full-featured e-commerce web application for a laptop store using Spring Boot MVC.

- Implemented Spring Security with Role-Based Access Control (RBAC) for Admin and User roles.
- Built complete shopping features: product filtering via JPA Specifications, cart management, and checkout workflows.
- Integrated a custom File Upload Service to manage product assets and user profile images.

Job Recruitment NestJS

NestJS, MongoDB, Multer, Swagger

GitHub: <https://github.com/ThanhAnh2004/Job-recruitment.git>

- Built a RESTful backend API for a job recruitment platform using NestJS and MongoDB.
- Implemented a dual-token authentication system (JWT Access & Refresh tokens) with granular RBAC managing Admins, Recruiters, and Candidates.
- Engineered a high-performance database layer with MongoDB for efficient data management.
- Developed a complete CV/Resume management system with status tracking for the recruitment workflow.
- Built a secure file upload system for resumes and user profiles using Multer, ensuring optimized storage and retrieval.
- Delivered fully documented API via Swagger UI, enabling easy integration and testing for frontend developers.
